

Baby Steps Camino

The organizers' manual

How to run registration, the wait list, the money and the three days of the walk, using the Register program.

Everything in this manual is done from a web page. You need no special software, only a computer or a phone and the address on the next page.

Written for the 2026 walk, December 4th, 5th and 6th.

What is in this manual

1 Start here

Register is the program that takes sign-ups for the Baby Steps Camino and helps you run the weekend. It does five jobs.

1. It takes sign-ups from pilgrims on a public web page.
2. It keeps the list of who is coming, and holds the wait list when a track fills up.
3. It keeps track of who has paid and who has signed the waiver.
4. It gives you counts, reports and spreadsheets.
5. On the three days of the walk it checks people in.

1.1 Who does what

A pilgrim	Signs up on the public page. Needs no account and no password. Gets an email with a private link, and can change or cancel their own registration from it.
You, an organizer	Log in and use the backoffice: the roster, the money, the reports, the settings.
A check-in volunteer	On the three days, uses the check-in app on a phone to tick people off and hand out wristbands.

Baby Steps Camino®
Edit text
Registration

Rehearsal mode: signing and payment complete themselves and no email is sent.

Register for the Baby Steps Camino

Three days of beach walking, prayer and fellowship from Jacksonville Beach to the Shrine of Our Lady of La Leche in St. Augustine, December 4 to 6, 2026. The full schedule, parking and what to bring are on babystepscamino.com.

2% of the full Camino is taken

The full Camino

Friday, Saturday and Sunday, December 4 to 6. About 10 miles a day along the beach, with Mass, a Holy Hour, and a social each afternoon. Walk all three days or any of them.

For anyone walking on Friday or Saturday.

What a pilgrim meets: the public page, on a telephone.

1.2 The two addresses

There are two web pages, and it matters which one you are on.

The public page	<code>forgave-infect.nisfeb.com/apps/register/</code> This is what pilgrims see. Anybody may open it.
Your backoffice	<code>forgave-infect.nisfeb.com/apps/register/admin</code> This is yours. It asks for a password.

Put the second address in your bookmarks. You will use it most days.

Good to know

If your addresses are different from the ones printed here, whoever set the program up will have given you the right ones. Everything else in this manual works the same way.

2 Logging in, and putting your name in

2.1 The password

All the organizers share one password. It is a string of four short words joined by dashes, like `lopdyt-monbyn-fabnyr-hasrev`. Ask whoever set the program up for it, and keep it somewhere safe.

1. Open `forgave-infect.nisfeb.com/apps/register/admin`
2. If a login page appears, type the password and press the button.
3. The roster appears. You stay logged in on that computer for about a week, so you will not be asked again every day.

2.2 Your name

Because you all share one password, the program cannot tell which of you is which. So it asks you, once, on each computer or phone you use.

Look at the top right of the screen. If it says **Set your name**, press it and type your first name.

The screenshot shows a web application interface with a navigation bar at the top containing links: Register, Roster, Today, Reports, Counts, Emails, Settings, Backup, and Check-in. Below the navigation bar is a light blue dialog box with the text "Who is making changes? Your name goes in the history." and a text input field. At the bottom of the dialog box are two buttons: "Save" and "Cancel".

The name box. It appears by itself the first time you try to change something.

From then on the top right says **Acting as Susan**, and every change you make is signed with your name in that registration's history. If someone later asks who cancelled the Brennans, the answer is on the record.

Careful

The program remembers your name in that one web browser only. On a different computer, or on your phone, it will ask again. That is normal. Press the name at the top right any time to change it.

3 What a pilgrim does

You will be asked about this on the telephone more than about anything else in the program, so it is worth reading once even though none of it is your work. A pilgrim never has a password and never has an account. They do four things.

3.1 1. They choose a track and fill in the form

Baby Steps Camino* [Edit text](#) [Registration](#)

Rehearsal mode: signing and payment complete themselves and no email is sent.

Register for the Baby Steps Camino

Three days of beach walking, prayer and fellowship from Jacksonville Beach to the Shrine of Our Lady of La Leche in St. Augustine, December 4 to 6, 2026. The full schedule, parking and what to bring are on babystepscamino.com.

2% of the full Camino is taken

The full Camino

Friday, Saturday and Sunday, December 4 to 6. About 10 miles a day along the beach, with Mass, a Holy Hour, and a social each afternoon. Walk all three days or any of them.

For anyone walking on Friday or Saturday.

The public page, on a telephone. Two doors: the full Camino and the Bambino Camino.

They pick the full Camino or the Bambino Camino, say who is walking, which days, and which meals, Masses and rides they want, and give one address and one telephone number for the whole party. One person signs up for everybody: a family is one registration, not four.

The two doors offer different forms. The **full Camino** asks which of the three days they walk, and then shows each of those days' Masses, Holy Hour, socials and rides. The **Bambino Camino** is Sunday and only Sunday: the last 2.5 miles from Vilano Beach, with no choice of distance, and with Sunday's Mass and trolley beside it. Nothing from Friday or Saturday is offered, and the program clears those answers itself if anything ever sends them, so a Bambino pilgrim can never turn up on Friday's roster.

The form saves itself as they go. Somebody who closes the tab halfway through and comes back finds their answers still there. Until they press the button at the bottom it is a *draft*, and drafts are the people worth chasing; see the Roster chapter.

3.2 2. They read and sign the agreement

The screenshot shows a web page for 'THE Baby Steps CAMINO'. The header includes a logo, navigation links (HOME, FAQs, Blog, About, Gallery, Order of Malta, Contact), and buttons for 'Edit text' and 'Registration'. A yellow banner states: 'Rehearsal mode: signing and payment complete themselves and no email is sent.' The main heading is 'Sign the waiver'. Below it, text reads: 'Every pilgrim signs a liability waiver before walking. You sign once, for yourself and for everyone in your party: Peter Brennan and Anne Brennan.' A prominent red button says 'Read and sign the agreement'. At the bottom, small text identifies the organization as the 'Sovereign Military Hospitaller Order of Saint John of Jerusalem of Rhodes and of Malta, American Association. A 501(c)(3) organization.'

After signing up, this. One button.

Every pilgrim signs a liability waiver before walking, and the person

who signed up signs once for the whole party, children included. There is no paper, no second website and no separate email: it happens on the page.

The pilgrim's agreement

Please read this in full. You are agreeing for yourself and for everyone in your party: Peter Brennan and Anne Brennan.

REPLACE THIS WITH THE WAIVER THE ORGANIZERS USE. Open the registration page as the owner, press Edit text, and paste the agreed wording here.

The Baby Steps Camino is a walk of about ten miles a day along a public beach, in December, in weather nobody controls. I understand that walking it carries risks, including injury from the terrain, the water, the weather and the traffic at road crossings, and I accept those risks for myself and for everyone in my party, children included.

I release the Sovereign Military Hospitaller Order of Saint John of Jerusalem of Rhodes and of Malta, American Association, its members and its volunteers from any claim arising out of my taking part, except for their own gross negligence.

☐ I have read and agree to the terms above, for myself and for everyone in my party.

Read to the end to continue.

Adopt and signClose

The agreement itself. The tick box is grey and the button pale until they have scrolled to the bottom.

Two things are deliberate here, and both come up on the telephone:

- **The tick box does nothing until they have scrolled the words to the very end.** A line under it says *Read to the end to continue*. Nobody can agree to words the page never showed them.
- **The button stays pale until the box is ticked.** Then **Adopt and sign** turns red and works.

☒ I have read and agree to the terms above, for myself and for everyone in my party.

Adopt and signClose

*Read to the end, and ticked. **Adopt and sign** works now.*

Close, or the Escape key, leaves without signing. Their spot is still held; they can come back to the same link.

Careful: the words are yours, and they start as a placeholder

A brand-new program ships with the agreement reading *REPLACE THIS WITH THE WAIVER THE ORGANIZERS USE*, followed by plain-English terms written as an example. **Somebody must paste in the wording your lawyer approved before registration opens.** It is edited the same way as every other piece of writing on the page; see the chapter *Changing the words pilgrims read*, and look for **The agreement** in the row of steps.

The program records which exact wording each pilgrim agreed to. If you change the words later, everybody who signed before the change is on record as having agreed to the old ones, which is correct and is the whole point. A pilgrim who happens to have the page open while you change it is asked to read it again rather than being signed up to something they did not see.

3.3 3. They pay

The screenshot shows a web form titled 'Pay the registration fee'. At the top left is a logo for 'THE Baby Steps CAMINO' with a red star. To its right is a navigation menu with links: HOME, FAQs, Blog, About, Gallery, Order of Malta, and Contact. Further right are two buttons: 'Edit text' and 'Registration'. Below the navigation is a yellow banner with the text: 'Rehearsal mode: signing and payment complete themselves and no email is sent.' The main heading is 'Pay the registration fee'. Below this, it says 'Your spot is held. Registration fee for Daniel Okafor: \$75.' There is a section titled 'How much would you like to pay?' with three radio button options: 'The registration fee: \$75' (which is selected), 'The full cost of one pilgrim's weekend: \$150. The fee covers only part of it.', and 'Another amount'. Below the options is a red button labeled 'Pay \$75'. At the bottom of the form, there is a small text block: 'Sovereign Military Hospitaller Order of Saint John of Jerusalem of Rhodes and of Malta, American Association. A 501(c)(3) organization.'

The payment step. The registration fee is chosen for them; the other two are offers.

The page offers three amounts:

- **The registration fee.** What the party owes. Chosen already, so a pilgrim who is not reading carefully pays the right thing.
- **The full cost of a pilgrim's weekend.** What it actually costs you to put one person on the beach for three days, which is more than the fee. You set this figure in Settings.
- **Another amount**, with a box. It will not accept less than the fee.

Whatever they pay above the fee is recorded as a **gift**, kept separate from the registration money on their record and in Stripe, so your bookkeeping does not have to untangle the two.

Pressing the button sends them to Stripe's own page to type their card number. Their card details never touch this program. When Stripe

says the money is taken, they come back, the registration completes, and the confirmation email goes out.

Good to know: a pilgrim who closes the tab after paying

It still completes. Stripe tells the program separately, so a payment is never lost because somebody shut their laptop at the wrong moment. If you ever see a registration sitting at *payment* that the pilgrim swears they paid, look at their record: the History says what happened, and the Payment card will show the Stripe reference if the money arrived.

3.4 4. They keep their private link

The confirmation email carries a link that is theirs alone. From it they can change their answers, add or remove somebody, or cancel, right up until the changes deadline. On each morning of the walk that link also checks them in.

Careful

That link is a password. Anybody holding it can change that registration. If a pilgrim loses it, they can ask for it again from the bottom of the public page, or you can send it from their record with **Send this email again**. Never post one in a group message.

4 The Roster: your everyday screen

The roster is the list of everyone who has signed up. It is the first thing you see, and most days it is the only screen you need.

The whole roster screen. The names are links: press one to open that registration. The parts of it are shown close up on the next few pages.

4.1 The row of buttons along the top

Register
Roster
Today
Reports
Counts
Emails
Settings
Backup
Check-in

The row of buttons. It is the same on every screen.

Press any of them to change screens. **Register** at the far left always brings you back to the roster.

The small round dot beside your name is green when the page is listening for changes. If another organizer changes something while you are looking, your screen updates by itself within a few seconds. You never need to reload the page.

4.2 Segment: showing only part of the list

Segment

registrations

▼

Search

Name, email, phone or ξ

▼

Track

all

▼

Add a registration

Copy 8 emails

7 of 325 pilgrims, 2 of 25 Bambino, 0 on the wait list, 9 drafts

The three boxes that narrow the list, and the line of totals underneath.

The box marked **Segment** narrows the list. It starts on **registrations**, which means everyone who actually signed up: it leaves out abandoned sign-ups and cancellations.

registrations	Everyone real. Where you start.
everything	Adds abandoned sign-ups and cancellations.
complete	Paid and signed. Nothing left to do.
pending	Still owes a waiver, a payment, or an assistance decision.
wait list	Waiting for a spot.
financial	Asked for help with the fee.
assistance	
unpaid	Has not paid.
unsigned	Has not signed the waiver.
drafts	Started the form and never finished. Worth an email.
cancelled	Cancelled.
Bambino only	The Sunday-only track.
non-walkers	Coming, but not walking.
NE Florida Order	Local members and volunteers.
of Malta and	
volunteers	
exempt	Marked as not counting against the caps.
admin adds	Ones you added by hand.

4.3 Search

Type a name, an email address, a phone number or a parish into the **Search** box. It looks for every word you type, in any order, so `mary smith` finds Smith, Mary. Punctuation does not matter: `9045551234` and `904-555-1234` both work.

4.4 The line under the boxes

Something like: *212 of 325 pilgrims, 3 of 25 Bambino, 0 on the wait list, 7 drafts.*

Read that first number carefully. It counts *walkers against the cap*, not rows on the screen. It leaves out anyone who is not walking, anyone you marked exempt, and anyone you added yourself, because none of those count against the cap. So it will not match the number of lines you can count in the table, and that is correct.

4.5 The columns

Party	Everyone in the registration, with the email address underneath. Press a name to open it. Press the email to write to them.
State	Where they live. Useful for the local versus out-of-town question.
Status	Where they are up to. See the table below.
Track	<i>full</i> is all three days. <i>bambino</i> is Sunday only.
People	How many are in the party, children included.
Walkers	How many of them actually walk.
Created	The day they signed up.
Fees	What the party owes in total.
Paid	How they paid, once they have.
Waiver	Whether the waiver is signed.
Check-ins	Ticks for the days of the walk they have arrived.
Flags	Small labels: exempt, assist, admin, non-walker, K/D (Knight or Dame), vol (volunteer), refunded.

Press any column heading to sort by it. Press it again to sort the other way.

4.6 What the statuses mean

This is the one piece of vocabulary worth learning. The words are the program's, and they are short, so here is what each one actually means.

STATE	STATUS	TRACK	PEOPLE	WALKERS	CREATED ↓	FEE	PAID	WAIVER	CHECK-INS	FLA
FL	WAIVER	full	2	2	2026-09-22	\$150			-	
NC	PAYMENT	full	1	1	2026-09-22	\$75		completed	-	
FL	COMPLETE	bambino	2	2	2026-09-22	\$50	stub	completed	-	
GA	COMPLETE	full	1	1	2026-09-22	\$75	stub	completed	-	K/E
FL	COMPLETE	full	3	3	2026-09-22	\$225	stub	completed	-	

The status column. On screen the words are in capitals; that is only styling.

draft	They started the form and never finished. Nothing is held for them. They are worth an email.
waitlist	The track was full when they signed up. They have a place in the queue and nothing else.
waiver	Needs to sign the waiver. Their spots are held.
payment	Needs to pay. They have signed. Their spots are held.
assistance	They asked for help with the fee and are waiting for your decision.
complete	Signed and paid. Done.
cancelled	Cancelled, by them or by you. Their spots went back into the pool. You can put it back if it was a mistake.

Good to know

A spot is held for 48 hours from sign-up. If someone signs up and then never pays, after two days their spot quietly goes back to the pool, so an abandoned checkout does not keep a real pilgrim out. Their registration stays, and they can still finish.

4.7 Writing to several people at once

The **Copy 8 emails** button copies the email addresses of everyone currently shown. Choose a segment first, say **drafts**, press the button, then paste into the To line of an email. That is how you chase the people who never finished.

The number on the button can be smaller than the number of rows. A sign-up that left only a telephone number has no address to copy, and two people who typed the same address count once.

5 One registration

Press any name on the roster. You get the whole registration: their details on the left, and everything you can do about it on the right.

The Status card.

The status badge, the track, how they signed up, the fees, when they signed up and when it last changed, and whether they are exempt from the caps.

5.2.2 Payment

Payment

Method stub
Amount \$225
Gift \$0
Paid at 2026-09-29 23:50:01
Reference stub
Refunded no
Note

Mark this payment refunded

The Payment card, on a party that has paid.

What they paid, how, when, and any reference. A party that paid more than the fee shows the extra separately as a **gift**; the registration money and the gift are never added together here, and they reach Stripe as two separate lines as well.

A payment made by card reads *stripe*, and the reference is Stripe's own session number, which is what to quote if you ever have to ask Stripe about it.

If they still owe, you get a **Record this payment** form: choose *check*, *cash* or *other*, put in the amount, a reference such as a cheque number, and a note. That completes the registration.

If a payment exists, **Mark this payment refunded** flags it. The actual refund is done in Stripe; this only writes it on the record.

5.2.3 Waiver

Waiver

Method stub

Status completed

Signed at 2026-09-29 23:49:58

They signed on paper

The Waiver card. This one was signed while the program was in rehearsal, so it says stub.

Whether they signed, how, and when. **They signed on paper** records a paper waiver for somebody who could not sign online.

Method is usually *adopt*: they read the agreement on the page and pressed **Adopt and sign**. Under it, **Wording signed** is a long code: a fingerprint of the exact words they were shown, so that if the agreement is ever rewritten you can still tell who agreed to which version. You never need to read it. It is there for the day somebody asks.

The other answers are *paper*, which you recorded yourself, and *stub*, which means it was signed while the program was in rehearsal and is not a real signature.

5.2.4 Actions

Actions

Cancel this registration

Cancellation note

Email

confirmation

Send this email again

The Actions card. Which buttons appear depends on where the registration has got to.

Which buttons appear depends on the status.

Offer them a spot	On a wait-listed party. Moves them into the queue to sign and pay.
Approve assistance	Completes the registration with no payment.
Decline assistance	Sends them to the payment step.
Cancel this registration	For the whole party. Their spots go back. You are asked to confirm.
Put it back	On a cancelled one. Returns it to exactly the status it had before.

Under the actions there is a box to pick an email template and press **Send this email again**.

Good to know: the clock

Times on these cards are shown in Greenwich time, which runs five hours ahead of Florida in December. A sign-up at eight in the evening therefore reads as the next day. Only the display is affected; the program itself knows which day is which. This is on the list to put right.

5.2.5 Check-ins and History

Check-ins show who arrived on which day, at what time, and who ticked them off. **Undo** takes one back.

History

2026-09-29 23:50:01 pilgrim · paid (stub)

2026-09-29 23:49:58 pilgrim · signed the waiver (stub)

2026-09-29 23:49:56 pilgrim · submitted

The History. Newest at the top.

History is the whole story of the registration, newest first: every change, who made it and when. Nothing is ever lost. This is what to read when somebody asks what happened.

6 Adding a registration yourself

For someone who telephoned, sent a cheque, or turned up on the day.

Add a registration

The registration window and the track caps do not apply here. This one draws on the late-add pool.

Contact

Track

full

Email

Phone

Street

City

State

ZIP

Organization

The Add screen. The same form a pilgrim fills in, plus a card for what you took from them.

1. Press **Add a registration** on the roster.
2. Fill in the form the way the pilgrim would have.
3. On the right, under **What you took from them**, tick **Waiver signed on paper** if you have their signature on paper.
4. Now choose how they paid and put in the amount. **The payment boxes stay greyed out until the waiver tick is on**, because a pilgrim signs before they pay.
5. Press **Add this registration**.

What you took from them

☐ Waiver signed on paper

Paid by

none

Payment follows the waiver, so tick the paper waiver first. The ship refuses a payment without it rather than dropping it.

Add this registration

What you took from them. The payment boxes wake up once the waiver is ticked.

The registration window and the caps do not apply here, because you have looked and decided. These come out of the pool of late places the organizers hold back.

7 The wait list

When a track fills up, the public page stops taking sign-ups for it and offers the wait list instead. A wait-listed party has a place in the queue and nothing else: no waiver, no payment.

You decide who gets in. To offer somebody a spot:

1. Choose the **wait list** segment on the roster.
2. Open the party you want.
3. Press **Offer them a spot**.

They move to the waiver step and their spots are held, whatever the cap, because you have looked. Their number in the queue is shown beside the status on the roster.

Good to know

Last year 50 to 60 people cancelled. Every cancellation frees spots, and the wait list is where you fill them. It is worth checking the wait list whenever a cancellation comes in.

8 The event weekend

This is the part you will use on the three days themselves. There are three ways a pilgrim can be checked in, and they all end up in the same place.

1. **The pilgrim checks themselves in** from a link you email them that morning. This is the main way.
2. **A volunteer ticks them off** on a phone at the start line.
3. **You tick them off** from the Today screen.

8.1 The Today screen

The whole Today screen. Each part of it is shown close up below.

At the top: Friday, Saturday and Sunday. It opens on today if today is one of the three, so most of the time you need not touch it.

2 of 8 expected Friday checked in, 25% 4 parties not here yet

How the day is going, in one line.

Under that: 2 of 8 expected Friday checked in, 25% and 4 parties not here yet. **Expected** means the people in complete parties who are walking that day or coming to that day's social. A Sunday-only family is not expected on Friday, and is not counted.

8.1.1 Emailing the day's check-in links

Email Friday's check-in links

☐ Send again to everyone who already got one

☐ It is not Friday yet. Send anyway

Rehearsal: no email leaves the ship. Sends the link to every complete party expected Friday, not yet checked in, that has not had one.

The send box. Here the button is greyed out because today is not Friday.

Each morning of the walk, press **Email Friday's check-in links** (the button names the day it will send). It goes to every complete party who is expected that day, has not been checked in yet, and has not already had that day's link. Press it again later in the morning to catch the ones added since. Nobody gets two.

Careful

The button only works on the day itself. Looking at Saturday's tab on a Friday, the button is greyed out and a second tick box appears: **It is not Saturday yet. Send anyway**. That is deliberate. It stops a whole event's worth of emails going out a day early.

8.1.2 The list

Show starts on **someone missing**, which is what you want while you are looking for people: a party stays on the list until the last of them has arrived. The other choices are **nobody here yet**, **everyone here**, and **everyone, any day**.

PARTY	WRISTBAND	CHECK IN
◦ Margaret Alvarez ◦ Thomas Alvarez ◦ Lucy Alvarez m.alvarez@example.com	WRISTBAND	Check in everyone Margaret Thomas Lucy
◦ Rita Donnelly rita.donnelly@example.com	WRISTBAND	Check in

One party on the list, with a button for the whole family and one for each person.

Each row shows the party, whether they get a wristband, and buttons to check them in. A circle means not arrived; a tick means arrived,

with who ticked them off and at what time. *themselves* means the pilgrim used their own link.

Check in everyone does the whole party at once. The individual names check in one person.

8.2 What the pilgrim sees

Baby Steps Camino* [Edit text](#) [Registration](#)

Rehearsal mode: signing and payment complete themselves and no email is sent.

Check in

Welcome. Tick everyone who is here today, then press the button. Someone who arrives later can use this link again.

☐ Margaret Alvarez

☐ Thomas Alvarez

☐ Lucy Alvarez

[Check us in](#)

Sovereign Military Hospitaller Order of Saint John of Jerusalem

The pilgrim's own check-in link. A party of three, so there is a box for each person.

Check-in Backoffice Synced

Fri Sat Sun

Roster Counts Checking in as Susan

Last name, first name, email or code

11 walking today, 12 checked in, 6 at Mass

No wristband: cancelled 47113debca

Margaret Alvarez

walk bus Mass Holy Hour social

Check in, no wristband: cancelled

Thomas Alvarez

walk bus social

Check in, no wristband: cancelled

The volunteers' app, on a phone at the start line.

Somebody walking alone gets one button, **I'm here**. A family gets a box per person and one button, so a wife can check in before her husband parks the car. Anyone who arrives later can use the same link again.

Before the day, the link says when check-in opens. After the walk, it says the Camino is over. A pilgrim who has not paid is told to see the organizers at the start.

Good to know

A pilgrim can only tick people *in*. They cannot undo anyone. Taking a check-in back is yours and the volunteers' to do.

8.3 The volunteers' phone app

The volunteers use a different address, ending in `/checkin` instead of `/admin`. They log in with the same password and put in their own first name, the same way you do.

It is built for the beach. It works with no signal: the roster is kept on the phone, and taps wait in a queue and go up when the phone finds a signal again. The badge at the top says *Synced* when everything is up, *3 to send* when taps are waiting, and *Offline* when the phone has no signal.

One tap on a name checks a person in and answers the wristband question. **Wristband: give one** in green means they are paid and signed. **No wristband:** in red gives the reason, for instance *unpaid* or *waiver not signed*. The volunteer can still check them in, and the reason stays on the record for you to sort out.

Careful

Have each volunteer open the app, log in, and put their name in *the day before*, at home, where there is a good signal. That way the phone already holds the roster when they get to the beach.

8.4 Counts

The **Counts** screen is where the actual head counts go: how many were at Mass, on the walk, at the social, on the bus, each day. Type the number, the time and a note, and press **Save the counts**. These sit beside the planned numbers in Reports, so next year you know how many really came.

Time and **Note** are ordinary boxes: write whatever is useful, such as *just after eight*. A box left empty is not a zero, it means nobody filled it in, and Reports treats it that way.

9 Reports and spreadsheets

The top of Reports. Everything here is worked out from the roster, so it is always current.

Reports has no buttons to press and changes nothing.

Against the caps

Full track: 4 of 325

Bambino: 2 of 25

Friday social: 2 of 300

Saturday social: 3 of 200

Late adds: 0 of 50

Wait list: 0

How full the event is, against every cap.

It also shows:

- How full each track and each social is, against its cap.
- How many are in each status, and on each track.
- Payments, by method, with the amounts and any gifts. A refunded payment is still counted in this total, so for the exact picture give the treasurer the spreadsheet instead.
- What is still owed, and how many have not signed.
- Planned against actual, per day and per activity, with how many checked in.
- How many Sunday walkers against the 350 the Shrine can feed.
- Where people come from, which parishes, and sign-ups per day.

Still owing

Unpaid 0 registrations, 0 people, \$0 in fees

Unsigned 0 registrations without a completed waiver

Live registrations only, so a draft or a cancelled one is left out.

What is still outstanding.

9.1 The two spreadsheets

At the top of Reports are two links. Press one and your computer downloads a file you can open in Excel.

people.csv	One line per person. Use this for name badges, wristbands, bus lists and Mass counts.
regs.csv	One line per registration, with the money and the history. Use this for the treasurer.

Hold hours

48

The window: when sign-ups open, when they close, and the last moment a pilgrim may change their own.

Name	What the event is called.
Hours from UTC	Leave it at –5. It tells the program what day it is in Florida, so check-in opens at the right hour.
Days, one per line	The three dates of the walk, earliest first, written year first: 2026-12-04.
Public URL	The address pilgrims use.
Fees	In dollars. Per person, children included.
Suggested full cost	In dollars. What one pilgrim's weekend really costs you. It is offered on the payment page as a second choice beside the fee, and anything paid above the fee is recorded as a gift. Set it to the fee to stop offering it.
Caps	How many may sign up for each track and each social, and how many late places you hold back. The Shrine number is reported only, never enforced.
Window	Opens is when the public page starts taking sign-ups. Closes is when it stops. Changes close is the last moment a pilgrim may edit their own registration. These three show the time on <i>your own computer</i> . If you are setting them up from another time zone, allow for it.
Hold hours	How long a spot is held for somebody who has not finished paying. 48 is the normal answer.
Organizations	The parishes and groups the sign-up form suggests. One per line.
Providers	The card and email arrangements. See below.

10.1 Providers: rehearsal or real

Providers

Mode

stub

Mail from

Baby Steps Camino <register@babystepscamino.com>

Resend key

Stripe secret key

A key shown as four stars is stored. Leave it alone to keep it. In **stub** mode the ship takes registrations but no money and sends no mail; in **live** mode it charges cards through Stripe and mails through Resend.

Check the Stripe key

The Providers card. **Mode** is the switch between rehearsal and real.

This one card decides whether the program is playing or working.

stub	Rehearsal. Nobody's card is charged, no email leaves the program, and signing and paying complete themselves so you can walk through the whole thing. A yellow line across the top of the public page says so, and the Paid column reads <i>stub</i> .
live	Real. Cards are charged through Stripe and emails go out through Resend.

Careful: before you ever choose *live*

Four things have to be true, and none of them are things the program can do for you.

1. A **Stripe secret key** is in the box. Once saved it shows as four stars and cannot be read back, which is on purpose.
2. You have pressed **Check the Stripe key** and read the answer. It asks Stripe and says either *This is a test key: no real money moves* or *This is a LIVE key: real cards will be charged*. **Do not switch to live until that sentence says what you expect.**
3. A **Resend key** is in the box, and the address in **Mail from** is at a domain that has been set up and verified at Resend. Until it is, every email is refused and nothing goes out.
4. **Public URL** is the address pilgrims really use. Every emailed link and the return trip from Stripe are built from it.

If you are not sure about any of the four, ask whoever set the program up. Switching to *live* with a real key and a real card is real money.

11 The emails

[Register](#) [Roster](#) [Today](#) [Reports](#) [Counts](#) [Emails](#) [Settings](#) [Backup](#) [Check-in](#) ● Acting as Susan

Emails

The templates the ship sends. Every other string a pilgrim reads is edited on the public page itself: open it as the owner and press Edit text.

assistance approved

Subject

Your Baby Steps Camino registration is complete

Body

{{first}}, your request for assistance was approved and you are registered. Your registration: {{link}}

Placeholders: {{first}} {{link}}. The ship fills them by name, so keep every one.

Save this email

The Emails screen. One card per email the program sends.

Each email has a subject and a body you can edit. Press **Save this email** on that card when you are done.

The curly-bracket words, such as {{first}} and {{link}}, are filled in by the program when it sends: the pilgrim's first name, their private link, the total, and so on. The card lists which ones that email uses.

Careful

Do not delete a curly-bracket word. If you do, the program refuses the save and says *Put these back before saving*, and shows you which. Put it back and save again.

The refusal covers the whole card. If you improved the subject and then lost a placeholder in the body, both go back to how they were, so check the subject again before you save a second time.

You may move a curly-bracket word, put words around it, or use it twice. You simply may not lose one.

11.1 How to tell whether an email really went

An email can be written perfectly and still not arrive, because the sending service refused it. Open **Backup** and read the log at the bottom of the page. Every attempt leaves a line:

stub	The program was in rehearsal. Nothing was sent, on purpose.
mail , a tick	The sending service took it.
mail , a cross	It was refused, and the line says why in the service's own words, for instance <i>the domain is not verified</i> . That is a setting to fix, not a pilgrim to chase.

The morning check-in emails are careful about this: a pilgrim whose email was refused does not get ticked as sent, so pressing the button again picks them up.

Every other piece of writing that a pilgrim reads is edited on the public page itself, not here. See the next section.

12 Changing the words pilgrims read

Everything on the sign-up page, every heading, every label, every bit of help text, can be rewritten by you, in place, on the page itself.

1. Open the public page, `forgave-infect.nisfeb.com/apps/register/`, while you are logged in.
2. Press **Edit text** at the top.
3. Click any piece of writing and type over it.
4. Click away. A tick appears when it is saved.

A row of buttons appears, **Show all steps**, with one for each page a pilgrim might see: the landing page, the form, the waiver step, the payment step, the wait list, and so on. Press one to see that page, filled with a made-up example, so you can edit its words without having to sign up yourself.

The agreement lives here too

Press **The agreement** in that row and the waiver opens. While **Edit text** is on, the terms are shown as one block of plain text rather than as tidy paragraphs, because this is the one string that has to be replaced whole rather than a line at a time. Click into it, select everything, and paste your own wording over it.

This is where the real wording has to be pasted in before registration opens, over the placeholder the program ships with. It is the one piece of writing in this program that a lawyer should see.

Leave a blank line between paragraphs; that is how the page knows where one ends. There is room for about twenty pages of text, far more than any waiver needs.

Careful

While **Edit text** is on, nothing else on the page works: buttons do nothing and boxes cannot be typed in. That is on purpose, so you cannot accidentally sign yourself up while editing. Press **Editing text** again to turn it off.

2026-09-29 22:42:23	confirmation email	rehearsal	0e057108d6	You are registered for the Baby Steps Camino
2026-09-29 22:42:23	moved on	the pilgrim	0e057108d6	complete
2026-09-29 22:42:20	moved on	the pilgrim	0e057108d6	payment
2026-09-29 22:42:19	signed up	the pilgrim	0e057108d6	waiver

The last of everything the program has done, newest first.

At the bottom of the Backup page is a list of the last two thousand things the program did: every sign-up, every change, every payment and every email it tried to send. Newest first. The registration number in each line is a link straight to that registration.

This is the page to open when somebody says *I never got the email*. A line shaded red is one that did not go through, and it carries the reason in the sending service's own words. A red line usually means a setting to put right, not a pilgrim to chase.

rehearsal	The program was in rehearsal mode. Nothing was sent, on purpose.
the mail service	A real send. Red means it was refused.
the pilgrim	Something a pilgrim did on the public page.
a name	Something one of you did in the backoffice.

13.2 Taking a backup

Press **JSON bundle** or **jam** and save the file somewhere safe: your own computer, and ideally a second place. Do this weekly once registration opens, and every evening during the walk.

The **jam** is the emergency copy and the exact one. The **JSON bundle** holds the same information in a form a person can read. Both leave out passwords and keys.

13.3 Putting a backup back

1. Press **Choose file** and pick the backup.
2. Press **Read the file**. The program tells you what is in it: how many registrations, the dates they cover, and how many of your current ones it would overwrite. It changes nothing yet.
3. If it looks right, press **Restore** and confirm.

Careful

The tick box **Delete every registration the file does not name** is for a true restore onto an empty system. Leave it *off* unless you are certain. A restore also stamps every registration as changed now, which restarts the 48-hour hold on anyone who has not finished paying.

Do the three steps in one sitting. If you wander off to another screen, or somebody signs up while you are deciding, the program asks you to

press **Read the file** again before it will restore. That is on purpose: it will only restore onto the situation it showed you.

14 If something looks wrong

It asks me to log in again

Normal after about a week, or on a new computer. Type the password again.

The page says the ship would not take that change

Something was refused. Look at the registration again: it will show what the program actually has. Then try once more.

A name I know is registered does not come up in Search

Check the Segment box. If it is on **registrations**, a cancelled or abandoned one will not show. Choose **everything**.

The page is slow

Give it a few seconds. Everything you press shows immediately and settles afterwards; you do not need to press twice.

A pilgrim says their link does not work

Open their registration and check the status. If they are cancelled, the link says so. Send them the right email again from the box under Actions.

I cancelled the wrong party

Open it and press **Put it back**. It returns to exactly where it was.

Two of us edited the same registration

The last save wins. Read the History at the bottom: it shows both changes, with names and times.

A pilgrim says they never got an email

Backup, then **Recent activity**. Find the line. If it is red, it says why, and it is a setting to fix. If it is not there at all, the program never tried: check that Mode is *live*.

A pilgrim says they paid but the program says they have not

Open their registration. If the Payment card names a Stripe reference, the money arrived and the program has it. If it does not, look in **Recent activity** for a red line mentioning Stripe, and check Stripe itself for a payment against their email address.

Nobody is getting the morning check-in emails

Press the button once more. If it sends a handful and then stops, the sending service is refusing them: **Recent activity** says why. The program stops rather than grinding through the whole list, and nobody it stopped short of is marked as sent, so pressing again once the setting is fixed picks them all up.

Good to know

Nothing you do here is truly lost. Every registration keeps its whole history, and cancellations can be put back. If you are unsure, look at the History before you worry.

15 Words this program uses

Backoffice	Your side of the program, at the /admin address.
Bambino	The Sunday-only track, the last 2.5 miles.
Cap	The most people allowed on a track or at a social.
Complete	Signed and paid. Nothing outstanding.
Adopt	How a pilgrim signs the agreement: they read it on the page and press Adopt and sign .
Draft	A sign-up somebody started and never finished.
Exempt	Marked as not counting against the caps. Used for local Order of Malta members and volunteers.
Full track	All three days of the walk.
Gift	Anything a pilgrim paid above the registration fee. Kept separate from the fee everywhere.
Hold	The 48 hours a spot is kept for somebody who has signed up but not finished paying.
Party	One registration, which may be one person or a whole family.
Live	The opposite of rehearsal: real cards, real emails.
Recent activity	The list at the bottom of the Backup page of everything the program has done lately.
Rehearsal (stub)	Practice mode: no real emails, no real money.
Resend	The service that carries the emails out.
The ship	The computer this program runs on. It shows up in a few messages.
Stripe	The service that takes the card payments. Pilgrims type their card number on Stripe's page, never on ours.
Track	Which walk they are on: full or Bambino.
Waiver	The liability form every pilgrim signs.
Wristband	What a checked-in pilgrim is given. Green means give one.

The one-page reminder

Your address: `forgave-infect.nisfeb.com/apps/register/admin`

Every day of registration

1. Open the roster. Read the line under the boxes for the totals.
2. Segment **pending**: who still owes a waiver or a payment.
3. Segment **financial assistance**: decisions waiting for you.
4. Segment **drafts**: press **Copy emails** and chase them.
5. Segment **wait list** when somebody cancels.

Every week

1. **Backup**, press **jam**, save the file somewhere safe.
2. On the same page, read **Recent activity**. Anything shaded red is an email that did not go out.
3. **Reports** for the totals and the money.

Each morning of the walk

1. **Today**. Check it is on the right day.
2. Press the **Email ... check-in links** button. It names the day, so on Friday it reads **Email Friday's check-in links**.
3. Press it again mid-morning for anyone added since.
4. Watch the percentage. Use **Show: someone missing** to find who is not here.
5. Check people in by hand when their phone will not cooperate.

Each evening of the walk

1. **Counts:** put in the day's real head counts.
2. **Backup:** take a copy.

This manual describes Register version 15.
